I have 8 years of experience in the development industry and specialize in e-commerce. I have experience working in both waterfall and agile environments from small to large corporate teams. I work well in a team and have experience leading and mentoring others to reach their goals. I am able to respond well under pressure and effectively work through procedures with people at various levels of experience from junior developers to upper management. I am always interested in learning new things and my wide set of skills can be applied to multiple different areas of software engineering.

## SKILLS

-  Linux (Debian, CentOS), Windows / OSX, PHP Storm / Vim, GiT Version Control, Vagrant / Packer, Apache / Nginx / lighttpd, Composer, Behat / PHP Unit, Ansible, Elastic Search, Jenkins
-  PHP 7/5, MySQL, HTML 5, Twig, CSS 3, SASS, JavaScript, VueJS, jQuery, NodeJS, Bash, Python, C, C#.NET, C++, Magento 1.9, Magento 2, Magento Extension Development
-  Symfony / Laravel, SlimPHP / FuelPHP, E-Commerce, Paypal / Stripe, Adyen / Sage Pay, BigCommerce, Shopify, Volo, Object Oriented Development, Agile Development Process, Behaviour Driven Design, Test Driven Development, Continuous Integration, 3D Modelling (Blender), Unreal Engine 4

## ACHIEVEMENTS

- ★ Developed a respected open source finance management application called PlasmaPHP
- ★ Developed 2 open source Magento extensions respected in the magento community
- ★ Developed a bespoke stock management and order syncing application for use with Zukeo's multi channel online business.
- ★ Successfully implemented a new development workflow using GiT & Vagrant at Presto Classical
- ★ Successfully implemented Behaviour Driven Design for new features on Presto Classics website using Behat
- ★ Became the go to developer for a number of large hospitality clients at Propeller Communications
- ★ Implemented a stable cloud based server infrastructure for an efficient development pipeline at Pantherella IGL

## HOBBIES

Wargaming & Board Games

Video Games

Cooking

Modelling & Lego

Hiking

Unreal Engine 4 & 3D Modelling

# WORK EXPERIENCE

 **ENQUIRYLAB** Lead Backend Developer *Feb 2018 - Present*

Working for an innovative inbound marketing agency I am required to lead the development team to deliver high quality integrations and websites for clients, with a focus on high conversion rates on client websites, including automation and abstraction within the development workflow. The goal of this is to provide an increasingly smooth and stress free experience for both our clients and our staff over time.

 **SPACECRAFT** Senior PHP Developer *Dec 2018 - Feb 2019*

Spacecraft needed a seasoned developer with a large amount of experience in the industry to help assist in modernizing certain aspects of the development workflow to help in streamlining existing development techniques within the company.

 **PANTHERELLA IGL** Lead PHP Developer *Feb 2018 - Dec 2018*

I made the decision to join a continually expanding e-commerce team at a manufacturer of luxury brand socks. As the Lead Developer it was my responsibility to manage the project moving the companies magento websites from an outside agency and in house. With this project completed I left the company with a solid and secure technical infrastructure designed for both website and team growth in the e-commerce industry.

 **PRESTO CLASSICAL** Senior PHP Developer *2016 - Feb 2018*

I joined the small in-house team at Presto Classical to work on an exciting opportunity to rebuild their entire website from the ground up. Using symfony components and the more modern PHP 7, including an agile approach to the project, meant this was the obvious choice to continue my career. Since working here I have gained plenty of experience in both the music industry and modern development technologies.

 **PROPELLER COMMUNICATIONS** PHP Developer *2014 - 2016*

Working at a large agency I gained experience working in large teams of people on big e-commerce projects. I earned respect as the go to developer for certain larger hospitality clients. While there, I amassed a large amount of knowledge and experience in various PHP frameworks and the PHP development industry.

 **ZUKEO (Simarc Trading, Milloutlets)** Full Stack Developer *2012 - 2013*

Working full stack for a successful online retailer specialising in textiles, I developed a bespoke system designed to maintain continuous integration with the companies warehouse management software (Volo) and the e-commerce platform used to run their website (BigCommerce). The system still operates without issues today. Here I gained a large understanding of the e-commerce needs of small to medium businesses.

 **OTHER RETAIL EMPLOYMENT** *2006 - 2012*

# EDUCATION

 **HND** Computer Science Coventry University *2003 - 2006*

 **A Levels** IT, Art, Media, Performing Arts Exhall Grange *2001 - 2003*

 **GCSE's** Incl. Maths & English Exhall Grange *1999 - 2001*
